

KETTERER CONTINENTAL WELCOME TO YOUR SECOND HOME

As always, Ketterer have stayed true to their philosophy: The CONTINENTAL has been designed using our experience and innovation helping us achieve luxurious and functional living of the highest standards. Therefore, it came as no surprise that the description “motor home” is no longer sufficient. “Second home” is a much better fit for this extraordinary travel vehicle.

With the Ketterer CONTINENTAL, Ketterer Spezialfahrzeuge AG begins a new chapter

With the Ketterer CONTINENTAL, Ketterer Spezialfahrzeuge AG begins a new chapter of its twenty-year success story.

Once again in the history of Ketterer, a concept has been realised which combines compact length with very spacious and luxurious living. Its particular focus: Function that goes hand in hand with design and style. The technical features were co-developed by the engineers of the Ketterer production team. This lets the Ketterer CONTINENTAL achieve a measurably unique position in the luxury vehicle market. It is easy to spot for its characteristic shapes and it’s beautiful profile. Spacious layout, architecture and design from front to back were prominent themes of the concept.

Perfectly created living spaces, cabins and salons infused with light, a strategic layout available in two versions, an elegant lounge atmosphere and high-performance functions on a total length of ten meters are the essential features of this extraordinary “Second home”.

In addition to the spacious living room, sporting a lounge feel as well as a dining and kitchen area, and the bathroom with large washstand and a shower with separate toilet, there is a bedroom with ample wardrobes. The large Master bedroom features a kingsize bed and can be turned into a spacious dressing room by virtue of the lockable double door to the living area. Common areas are designed for up to five people living on board and offer sufficient room for relaxation. The forward part of the vehicle features two rotatable seats, in addition to the driver and passenger seats. These are complemented by two more seats in the rear living area.

A special highlight: A lateral Ketterer POP OUT that can be moved above the ground to the length of seven meters, extending the living area into a new dimension by almost one meter. The sleeping area is designed to accommodate up to five people. The Ketterer CONTINENTAL is a "Second home" with an extreme obsession for details. Every decision for materials, solutions, technology and style Ketterer has made helped turn it into something unique. Welcome to your second home.

Award-winning.

Even before officially releasing the CONTINENTAL, Ketter caught the attention of the jury of the Caravaning Design Award 2010/2011 and won the renowned "Innovations for new mobility" award. Ketterer has now become the pioneer of a new dimension of travel vehicles.
