

Felina

Collection report autumn/winter 2011/2012

Felina GmbH, Mannheim

An attractive new style has been added to Felina's astoundingly successful NOS range *Passion* from the last autumn/winter season. A high-quality, bi-elastic material and elaborate voile embroidery make the range feel sensational on the skin, while an elegant matte-shine contrast creates a breathtaking look.

To kick off sales in May 2011 Felina will be adding a further attractive bra to the well-established *Passion* range. The **moulded underwired bra** was crafted out of a lightweight spacer fabric and will give the wearer a unique feeling of comfort. Featuring a stunning minimal look, this bra is the perfect addition to the range of smooth bra styles. It offers great comfort of wear thanks to a breathable cup fabric with properties that are superior to those of a rigid cup. The innovative fabric makes it invisible under tight outerwear and ensures optimum climate control. A timelessly elegant embroidered panel on the gore emphasises the sophisticated look.

This meticulous attention to detail shows the lingerie manufacturer's exquisite craftsmanship. Basic colours like **vanilla, black, white** and **maroon**, an elegant brown, underline the tasteful look of the range.
