

SPEEDLINK Repute Gaming Mousepad

Weertzen, 14.04.2010 – *SPEEDLINK*, one of Europe's leading manufacturers of PC and video console accessories, presents a mousepad that has been specifically designed for gamers: the Repute. Featuring a Thermoalign surface with an ultra-high-temperature-treated microfibre structure, the mid-size mousepad is designed to perfectly meet the needs of computer gamers. In addition, the shimmering-silver printed design on the top-left gives the Repute a refined and stylish look.

Thanks to the Thermoalign covering, made from an ultra-high-temperature treated microfibre structure, the surface of the Repute Gaming Mousepad is very fine. This allows the *SPEEDLINK* Kudos Gaming Mouse and other high quality mice to scan the surface with pinpoint precision – and also enhances their gliding characteristics thanks to the pad's especially low frictional resistance. At just 2mm, it's extra thin, plus the height difference between the mousepad and the desktop is hardly noticeable – for a really restriction-free gaming experience. The ingenious gliding area also improves ergonomic comfort thanks to the wrist cut-out. The backing is made from a special, non-slip material and offers especially good grip. On top of that, the hardwearing material can withstand a lot of frictional wear while also offering durability.

At 320 x 270mm, the Repute is large enough to accommodate even sweeping mouse movements – and as it doesn't have a restrictive lip, the surface is 100% useable.

The flexible Repute Gaming Mousepad simply rolls-up for transportation and will be available from mid-April 2010 for the RRP of €14.99.

Overview

- Microfibre structure surface
- Heat-treated surface for minimal friction
- Ultra-fine surface for precise tracking
- Non-slip backing for optimum grip on any surface
- Ingenious gliding area thanks to the wrist cutout
- Specifically developed for gaming as well as professional graphics and 3D applications
- Dimensions: 320x270mm, thickness: 2mm
