

Press Release

CubCadet – Z-Force S 48

Revolutionary Mower

Zero-Turn with Steering Wheel Control

With the Z-Force S 48, CubCadet is launching a zero-turn mower onto the market, which is incredibly suited to everyday use. The innovative Synchro Steer technology expands the scope of terrain enormously. The steering wheel controls the front wheels, thus controlling the rotating direction and speed of the back wheels.

The term “obstacle” will disappear from the vocabulary of the owner of the new Z-Force S 48 by CubCadet. Be it a hill or impassable terrain, bank or large area, the appliance gets through it all with the powerful Kawasaki OHV two-cylinder engine, which achieves 12 KW at 2,750 revolutions.

The innovative zero-turn mower has a steering wheel instead of a lever, making it considerably easier to operate. The new Synchro Steer technology ensures significantly better manoeuvrability and the steering wheel controls the front wheels, thus controlling the rotating direction and speed of the back wheels. This creates a higher stability on hills, better traction and even more control.

The low centre of gravity in connection with the efficient drive allows free movement even in complex landscapes. The Z-Force S 48 glides over uneven floors, the 122-centimetre FastAttach Deck with sensing rollers cleanly cuts every blade with its 3 blades.

Press Release

The rotary mower is electrically activated and manipulated using the foot pedal, from a working height of 25 to 106 millimetres. The Smartjet rotary mower cleaning system keeps the central cutter reliably clean. A mulch kit is provided as an accessory together with a grass collecting basket.

The steering column and seat can be individually adjusted with just a few movements, so that the Z-Force S 48 becomes the right tool for every user to make their home simply more beautiful. The comfortable seat with high backrest is equipped with armrests, a relaxing feature for long periods of use. The engine is started electrically. The 22.7 litre tank content makes a large radius possible. It travels up to eleven kilometres an hour forwards and six kilometres an hour backwards. And not to forget that the operating hours meter comes as standard – with the Z-Force S 48 by CubCadet, there are no more obstacles.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.

MTD, the “Modern Tool and Die Company”, with its headquarters in Cleveland, Ohio is the world’s largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, YardMan, CubCadet and also WOLF-Garten, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum if motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to miniature tractors.
