BELECTRIC Solarkraftwerke renamed BELECTRIC

Kolitzheim: BELECTRIC Solarkraftwerke GmbH is changing its name to BELECTRIC GmbH with immediate effect. With our increasing internationalization and growing presence on all continents, the name needs to be standardized and simplified. "By changing our name, we are taking account into the needs of international communication," said Bernhard Beck, CEO of BELECTRIC GmbH. "The move underlines the company's strategic approach of offering solutions from a single source all over the world."

Changes only apply to the company's name – the structure, business model, addresses and contact details will stay the same. The quality of the photovoltaic systems, high standard of service and close collaboration with customers will remain at the heart of the company's philosophy.

About BELECTRIC®: BELECTRIC is one of the most successful international enterprises in the development and construction of ground-mounted solar power plants and roof-mounted photovoltaic systems. As an international company, BELECTRIC is represented in over 20 countries. Its position as technology leader is a result of the high degree of vertical integration in the development and manufacturing processes. The combination of economic and ecological interests has always been the basis for the sustainable success of our 1,750 employees. BELECTRIC demonstrates its great innovative spirit with over 100 active patents. Alongside solar power generation, BELECTRIC Drive® works to develop the interface between photovoltaics and e-mobility. Further information can be found at www.belectric.com.

Publication and reproduction free of charge; a specimen copy is requested.
