

NEP Solar incorporated in Switzerland

Leading solar process heat collector supplier NEP Solar is now a Swiss stock company (AG) headquartered in Zürich

NEP Solar has moved its headquarter from Sydney to Zürich in a move to focus its resources on the emerging European solar process heat market. The new Swiss AG is supervised by a professional and experienced board of directors (Verwaltungsrat) and managed by the proven executive management team around Stefan Minder (CEO) and Johan Dreyer (Managing Director). The Australian operations NEP Solar Pty Ltd has become a 100% subsidiary of NEP Solar AG dedicated to the Australian and Far East markets.

About NEP Solar:

NEP Solar is a developer and supplier of concentrating solar thermal collectors for industrial process heat, solar cooling and seawater desalination. NEP Solar's PolyTrough 1200 and 1800 collectors supply solar heat efficiently at up to 250°C and have already been sold to a number of projects in Europe and Australia. See www.nep-solar.com for further information.
