New IHSE extender combines the worlds of KVM and SDI

Oberteuringen, August 17, 2016 – IHSE broadens the successful Draco vario KVM extender series with a new SDI Extender. 3G-SDI signals and embedded audio can now be combined with KVM data in Draco tera KVM switches and point-to-point extenders for transmitted over copper or fiber cables up to 10 km.

SDI is a worldwide video standard in the professional broadcast industry. For the first time, IHSE brings together the broadcast and digital video worlds in a single solution without compromising either.

The new module carries two SDI ports, providing dual-head support or enabling connection of a local monitor and is available with redundant interconnection options for greater reliability.

A special feature of the Draco vario SDI Extender is integrated signal conversion between SDI and digital video domains, including DVI, HDMI and DisplayPort; allowing viewing of content on a wide range of monitors, without the need for dedicated SDI displays for users and the use of Cat X and fiber for SDI extension.

The Draco vario SDI Extender will be available for live demonstration at IBC in Amsterdam, 9-13 September 2016, stand 7.B30, alongside IHSE's range of high-performance KVM switching and extension technology.

About IHSE

IHSE is a leading developer and manufacturer of advanced Keyboard, Video, Mouse (KVM) devices with more than 30 years of experience. KVM technology enables the remote switching, bidirectional extension and conversion of primary computer signals including DVI, HDMI, 4K DisplayPort, audio and USB. IHSE develops and manufactures an extensive range of KVM switches and extenders with visually lossless signal transmission from headquarters near Lake Constance, Germany.

IHSE products have been certified for outstanding manufacturing quality, security, operability, resilience and high transfer speeds. Many renowned companies and institutions across vertical sectors including Broadcast, Post Production, Air Traffic Control, Control Rooms, Banking, Industrial, Healthcare, Maritime, Education, Venues and Government rely on KVM solutions made by IHSE, Germany.
