Large French bank opts for latest CREALOGIX E-Banking 2.0 solution, plans international rollout in numerous European and Asian countries

CREALOGIX has made a further step towards becoming a software provider with international orientation and focus on the financial industry. One of the largest French banks has decided to introduce the complete CREALOGIX CLX.E-Banking Software Suite and to equip its customers with CREALOGIX security products.

Launch of the latest CREALOGIX product CLX.E-Banking 2.0

Starting from 2014, the France-based bank will gradually introduce the entire portfolio for mobile and stationary online banking in various countries. The mature modules map all functions that the bank's wealth management needs for its clients in France and numerous other European and Asian countries in order to gain a leading edge in a demanding market. At the same time, the bank will implement the CREALOGIX security solutions for comprehensive protection of its clients against cyber-attacks. The mobile security solutions will also be used.

More straightforward architecture, maximum quality in terms of stability and performance

The bank has opted for the latest product generation of CREALOGIX, which runs on the most up-to-date Rich Internet architecture technologies and simplifies the entire IT process. The

system architecture has deliberately been kept straightforward and provably offers high stability and high performance. Other key decision criteria included the flexible possibilities provided by the modular structure, the inexpensive maintenance costs and the comprehensive connectivity to the existing core banking infrastructure.

Customer-oriented solution

The CREALOGIX CLX.E-Banking Software Suite is the most comprehensive online banking platform for all channels. It combines state-of-the-art Internet banking with proactive client management modules. Clients can enjoy the freedom to perform their banking transactions at any time and anywhere.

Background information about CREALOGIX

The CREALOGIX Group is a leading independent software house in Europe and the Swiss market leader for E-Banking, E-Payment and Education.
