Layer2
BUSINESS DATA
LIST CONNECTOR V7
for SharePoint

COMPATIBLE WITH
SharePoint 2016 · SharePoint 2013 · SharePoint 2010
SharePoint Foundation · SharePoint 2007 · WSS 3.0

s> SharePoint

Features & Benefits

The Layer2 Business Data List Connector (BDLC) integrates almost any external data source directly with *native* SharePoint 2007/2010/2013/2016 lists:

- 100% SharePoint-based, codeless, browser-based solution: Connection setup within minutes. Just click "Connect to external data source" in the SharePoint list settings dialog.

- No programming or tools required.

- Data synchronization manually on demand or automatically in background using timer jobs with flexible settings for scheduling.

- Auto-mapping and manual field / column mapping supported including data type conversions.

- Almost *any* data source supported: ODBC, OLEDB, OData, ADO.NET-based providers, files (Excel, XML, CSV), SQL Server, SQL Azure, Oracle, MySQL, IBM DB2, IBM AS/400, Informix, PostgreSQL, OneDrive, SharePoint, Exchange, Office 365, Active Directory, Navision, Notes, SAP, ERP/CRM/CMS systems, RSS Feed, XML Web Requests and Web Services, etc.

- Data Provider for OData (Dynamics, SAP etc.), CSOM (SharePoint/Office 365), Exchange, XML/RSS included. Others can be connected via 3rd party.

- Optional use of write-back to data sources feature in real-time, full CRUD (Create/Update/Delete).

- Known SharePoint BCS issues completely solved: ALL SharePoint list features available now.

- Start SharePoint list workflows or send RSS / email notifications on external data change.

- Add additional "SharePoint-only" columns, e.g. for ranking, rating, tagging, comments or file attachments. Take external data offline.

- Large data sets supported with high performance. No problems with SharePoint List View Threshold.

- Save license costs for LOB systems while using native SharePoint lists to expose enterprise data.

"The BDLC provides users connectivity to external data sources from native SharePoint lists, with the ability for workflows to be triggered by external data changes."

Mike Fitzmaurice
Vice President of Product Technology at Nintex

Licensing & Partner Program

- Free Shareware Edition available for download after registration.

- License: US$ 1,065 / 749 € per SharePoint server (WFE and Application Servers)
