

CETECOM whitepaper: Radio Equipment Directive - The new radio equipment directive in detail

Summary: The new CETECOM whitepaper „Radio Equipment Directive - The new radio equipment directive in detail” provides insights, which products are affected by the directive and which potential ways lead to conformity.

April 3, 2017 / Essen, Germany – The new Radio Equipment Directive 2014/53/EU (RED) forces that all items of equipment with the directives scope, which need to be placed on the European market, must follow one of the new RED Conformity Assessment Procedures.

From June 13, 2017, no product can be introduced to the market without a conformity through the new RED. The old R&TTE conformity is not valid anymore.

This change has an impact on diverse market participants: manufacturers, importers and dealers. The new CETECOM whitepaper „Radio Equipment Directive - The new radio equipment directive in detail” provides insights, which products are affected by the directive and which potential ways lead to conformity and therefore to a product market launch in the EU.

Please download the whitepaper [here](#).
