

## **Logistics Day 2011 - for dbh window for intelligent solutions in the most exciting business field worldwide**

**Bremen, March 2011**

Logistics is a growing market. It currently employs 2.7 million people in Germany alone. Many people consider logistics to be one of the trailblazers of globalization, and not without good reason. For dbh Logistics IT AG logistics is the foundation for innovative and intelligent solutions in what is one of the most dynamic business fields worldwide.

At the nationwide Logistics Day on 14th April 2011 logistics experts and related companies will offer visitors an insight into the research projects, solutions and operating procedures involving companies from the business sector.

dbh is represented at two locations. They have an exhibition stand at BIBA (Bremer Institut für Produktion und Logistik), where they will demonstrate some very sophisticated logistics solutions, from customs software and compliance programs, via SAP Plugins right through to their latest development - an efficient rates management tool which recently won the IT 2011 Innovation Prize awarded by the Initiative Mittelstand.

**Did you know?** Two Bremen companies have combined to produce a solution for mobile intra and transport logistics: High Level Logistics IT - Business Intelligence for Freight Forwarding and Logistics. You can find out more at the joint stand of all in one GmbH and dbh Logistics IT AG at the Logistics Day 2011 in Bremen.

### **When and Where in Bremen?**

BIBA - Bremer Institut für Produktion  
und Logistik GmbH  
Hochschulring 20  
28359 Bremen

Start 5:00 pm

In Oldenburg, dbh will give the keynote address entitled "Intelligent Mobile Telematics and Process Control". The talk will be given by Stefan Engels, a member of the board at dbh Logistics IT AG, Bremen.

Examples of current best practices in IT innovations for logistics will be shown at Oldenburg Chamber of Commerce under the general heading "IT Innovations for the Logistics Sector".
