

## PRESS INFORMATION

### **TECHART Carbon Sport Package for the Porsche 911 GT3 RS.**

---

Leonberg, April 20<sup>th</sup>, 2016

*For a striking appearance and motor sport accents, TECHART carbon fiber parts set distinct exterior and interior highlights for Porsche cars. A special Carbon Sport Package has now been created for the 911 GT3 RS, providing a notable racy styling.*

#### **Sport Upgrade for the series outfit.**

TECHART carbon fiber aerokit components and trim parts distinctively set the personalized Porsche models apart from the standard vehicles and provide sincere motor sport styling highlights.

Carbon fiber is an ingredient material of many TECHART aerodynamic body parts. In order to use the material as a spotless refinement feature, it is crucial that the carbon fiber structure and surface is precisely manufactured and processed. Genuine TECHART carbon parts are quality made and ensure harmony in style as well as durability.

In addition, as TECHART carbon parts are manufactured inhouse, the components can be ordered with further personalization. Matt and high gloss finishes and even an individual color match can be applied according to the customers' wishes.

#### **Customers can decide which parts make the perfect Sport Package.**

The TECHART Carbon Sport Package for the 911 GT3 RS can be individually configured. Customers can decide for the complete package or to just set selected highlights.

The following parts are available in the TECHART Carbon Sport Package: front spoiler, wheel arch air outlet louvers, side skirts, side air intakes, side mirrors (Porsche SportDesign Mirrors, available in full carbon fiber or in lacquered/carbon fiber combination), roof spoiler, rear wing panels and rear diffusor.

In addition, carbon fiber interior refinement parts such as trims, steering wheel add-ons and carbon seat backpanels can complement the sporty upgrade.
