

THOMASLLOYD CLEANTECH CONGRESS EUROPE 2013

# Global Growth Market Renewable Energy Infrastructure

Sheraton Frankfurt Airport Hotel & Conference Center  
February 1, 2013, Frankfurt am Main

**CONGRESS PROGRAM**

Welcome,

Infrastructure – especially in the field of renewable energies – is one of the largest global growth markets of the 21st century. Against this background, the share of this particular asset class in the portfolios of private and institutional investors has significantly risen, and the sector has gained in importance. This is both due to and in spite of the general financial and economic crisis.

Infrastructure investments primarily provide security as regards measurable cash flow as well as high value stability. Due to the dominating role of the state, there have not been many opportunities for private individuals to invest in the various fields. However, the market is now opening up and welcoming private investors. The worldwide investment volume is constantly on the rise and will amount to USD 460 billion by 2030. Given that many countries are still experiencing financial difficulties, it is to be expected that the future will see private individuals play a vital role as investors.

As Europe's leading conference at a scientific level, the ThomasLloyd Cleantech Congress Europe 2013 is a unique opportunity for private and institutional investors, finance service providers, banks, and asset managers to gather information on global investment opportunities in the field of renewable energy infrastructure in a comprehensive and professional manner. The conference will address today's key questions and challenges relating to the industry as well as the latest scientific findings, and lay out the resulting plans of action. The aim of this event is to raise the overall understanding of renewable energy infrastructure as an asset class and to show current market participants how to tap the full potential of these high-potential investments.

Experience prominent international keynote speakers and leading experts from politics, science, industry, and the financial sector exclusively and live on February 1, 2013.

We would be pleased to welcome you to the third ThomasLloyd Cleantech Congress Europe in Frankfurt am Main.

T.U. Michael Sieg  
Chairman & CEO  
ThomasLloyd Group

## HIGHLIGHTS

### MODERATOR

#### SABINE CHRISTIANSEN

Sabine Christiansen is one of Germany's best-known journalists and television presenters. Christiansen started her career 30 years ago in public channel television. She initially worked in the business and political editorial team before moving on to present the main German news show "Tagesthemen". In 1998, she started her own eponymous talk show which became one of the most influential political news debate programs across Europe in the decade that followed. Moreover, she was the first German to host a global business program on CBNC. These and other shows were produced by her own television production company, TV 21, which she founded in 2002. She has been honored with every national and numerous international media awards. For her outstanding social engagement as a UNICEF Ambassador and the work of her own children's foundation, she has received the highest honors in Germany, France and worldwide (named Woman Of The Year, Gorbatschow Foundation). Sabine Christiansen is a member of five supervisory boards in German companies.

### KEYNOTE SPEAKERS

#### ARNOLD SCHWARZENEGGER

The world knows Arnold Schwarzenegger as a famous bodybuilder and a Hollywood action hero, but he is also a successful businessman, generous philanthropist and California's 38th Governor. Schwarzenegger's most notable accomplishments while governor include the nation-leading Global Warming Solutions Act of 2006 – a bipartisan agreement to combat global warming by reducing California's greenhouse gas emissions – and overhauling the state's workers' compensation system – cutting costs by more than 35 percent. In addition, Schwarzenegger was the first governor in decades to make major investments in improving California's aging infrastructure through his Strategic Growth Plan, helping to reduce congestion and clean the air. He established the Hydrogen Highway and Million Solar Roofs Plan, continuing his leadership in creating a greener environment.

#### SHEIKH ABDUL AZIZ BIN ALI AL NUAIMI

Sheikh Abdul Aziz bin Ali Al Nuaimi is a member of one of the ruling Royal Families in the oil-rich United Arab Emirates. He is known as the "Green Sheikh," taking the message of sustainability to the world, activating his networks worldwide and inspiring people of all ages, religions and backgrounds. He currently serves as Environmental Advisor to the Ajman Government, and the CEO of Al Ihsan Charity Centre. He is also Chairman of the International Steering Committee for the Global Initiative towards a sustainable Iraq and honourable President of Zayed Environmental Impact Network (ZEIN) at Zayed University UAE.

#### LORD NICHOLAS STERN OF BRENTFORD, KT, FBA

Lord Nicholas Stern is the author of the seminal Review on the Economics of Climate Change and former Chief Economist at the World Bank. He is currently the IG Patel Professor of Economics and Government at the London School of Economics and Chairman of the Grantham Research Institute on Climate Change and the Environment. In addition to his role at the Grantham Institute, Lord Stern is the Director of the LSE Asia Research Centre, Director of LSE's India Observatory and is a member and senior advisor of the following organisations: UK Green Investment Bank Advisory Group, United Nations Secretary General's High Level Advisory Group on Climate Finance, The International Advisory Board of the China Investment Corporation, The High Level Group on Energy and Climate Change Advising President Barroso of the European Commission, and a Special Adviser to the Global Chairman of HSBC Bank on Economic Development & Climate Change.
