## 100% Renewable Energy Conference

---

Dear colleagues and friends,

We have the great pleasure of inviting you to join us at the 100% Renewable Energy Conference.

**The conference will take place  
on 4 and 5 October 2016 in Flensburg, Germany.**

The conference brings together experts from science, business and politics to share their view on future energy scenarios with 100 % of renewable energy supply. Interdisciplinary and cross-sectoral exchange promotes the identification of solutions for and pathways to sustainable energy systems.

The conference program includes three parallel tracks: Technology, System Integration and the International Green Entrepreneurship Forum IGEF. Each track features five sessions with four presentations from invited speakers. Overall there will be more than 60 talks on a great variety of topics related to the transition to 100 % renewable energy supply.

As part of a binational series of annual conferences on renewable energy (even years, Flensburg) and climate neutrality (uneven years, Sønderborg) in the German-Danish border region this year's conference is hosted by Flensburg University of Applied Sciences and organized in collaboration with Europa-Universität Flensburg and the University of Southern Denmark.

For more information and to register please visit the conference website: [www.100RE-conference.org](http://www.100RE-conference.org).

We are looking forward to seeing you in Flensburg.

Best regards on behalf of the organizing committee
