-TECHART Winter Wheel Sets for the Porsche Macan models-

Leonberg, November 2014 – Prepared for icy conditions. TECHART Automobildesign offers attractive winter wheel sets in 21-inch to drivers of the Porsche Macan models.

TECHART Winter Wheel Sets for the Porsche Macan models.

Safety – Style. TECHART Automobildesign prepares the Porsche Macan models for the winter period. The combination of original 21-inch TECHART Formula Wheels and Pirelli Scorpion Winter Tires for the Porsche Macan S, Macan S Diesel and Macan Turbo is available now. Characterized by the classic design of its five spokes, the attractive design of the TECHART Formula light alloy wheel does not only result in a clear view of the braking system but also in effective heat dispersal. The TECHART Formula light alloy wheels can be ordered in silver or GTS (black) colour and generate an unmistakable appearance of the all-wheel drive compact SUV; on any surface and at any weather condition.

Wider tires at the rear are typical for a sports car and create not only a visual impact. Pirelli Scorpion Winter Tires produce driving stability and control on snow as well as a balanced handling on rain-drenched and dry road surfaces.

Offer of TECHART Automobildesign GmbH (Germany).
