### Stainless Steel LED Illuminated Latching Switch gets VDE Approval

This long awaited robust 22mm stainless steel switch now offers all the advantages in one single product.

The machine turned stainless steel body houses an ingenious mechanical switching mechanism offering full double pole changeover 5A 250V contacts and VDE approval in an extremely compact design.

Additional connectors are provided for connecting the ring illumination which is provided by integrated LED's in the colors blue, red, green, yellow, orange, red and white for voltages 6, 12, 24, 110 and 220V.

Not only does this switch have all the above features but is also designed to meet the requirements of IP67.

This new product means that designers now have the possibility to construct panels which are both aesthetically pleasing but at the same time meet the most stringent requirements.
