

## CETECOM extends SmartCard service portfolio with new Visa accreditation

**Summary:** Visa accredits CETECOM to perform acceptance device testing for contactless devices and readers.

**August 16, 2016 / Saarbrücken, Germany** – CETECOM, the premier wireless test and certification lab, is already known for its excellent SmartCard service portfolio. This wide range of services has now been extended as Visa accredited CETECOM to perform acceptance device testing for contactless devices and readers.

This Visa accreditation includes testing for

- **the full scope of Visa contactless device and reader including MSD / qVSDC and Cross Testing**

and extends the CETECOM testing and certification services for Visa, which already includes Visa Chip Card Testing (Contactless Level 1 and VCPS functional testing) and Visa Mobile Payment Testing (Contactless Level 1, HCE Level 1 and VMPA).

“The new accreditation is another great accomplishment for our team”, says CETECOM CEO Wilfried Klassmann. “It again strengthens our position as one of the top SmartCard laboratories globally as we extend our [SmartCard service offerings to our customers.](#)”

### About CETECOM

For over twenty years, CETECOM has been renowned as an independent test laboratory for mobile phones and other wireless devices. With over 400 employees and test labs in Europe, North America and Asia, CETECOM offers a unique service portfolio servicing the entire range of cellular and consumer wireless products. CETECOM is a leading test and certification lab for smart cards, RFID and NFC applications.

CETECOM provides testing services, consulting and training for wireless technologies: Cellular, Bluetooth, Wi-Fi, NFC and other systems. The company also performs a wide range of testing in the areas of mobile software applications, OTA, SAR, FCC, and EMC, field trials, acoustics, batteries and accessories.
