VARTA Microbattery GmbH at the Metering Billing/CRM Europe in Amsterdam from 15 th to 17th October 2013

VARTA Microbattery presents its latest energy solution at the Metering Billing/CRM Europe in Amsterdam from 15th to 17th October 2013.

At the worldwide leading event for metering, VARTA Microbattery presents energy solutions for gas, water, heat and electricity meters as well as for heat cost allocators and communication modules.

VARTA Microbattery provides a comprehensive range of batteries for smart metering systems with appropriate "design-in support". With its program VARTA Microbattery offers the complete service as well as a full range of primary lithium button cells and cylindrical cells.

VARTA Microbattery's battery systems have a low self-discharge, wide temperature range (between -55 to +85°C) and superior shelf life and operational life up to 15 years and more. Key features are also a broad capacity range (from 230 to 19000 mAh), advanced laser sealing technology, high energy density and resistance to corrosive environments.

VARTA Microbattery is looking forward to welcoming all interested visitors at **booth F39**.
