

PTCRB re-accredits CETECOM to perform certification testing

Summary: PTCRB has re-accredited CETECOM as one of the few global laboratories to perform the certification testing related to PTCRB standards.

March 10, 2017 / Essen, Germany – PTCRB certification is nowadays a prerequisite for wireless devices to sell in the North American market. PTCRB approval ensures compliance with the technical specifications as defined in the NAPRD (North American Program Reference Document) regulatory and network operator requirements.

Therefore, the PTCRB certification is an essential milestone for manufacturers who would like to market their products in the US and Canada. This not only affects the traditional mobile communication device manufacturers marketing mobile phones, but also cellular module integrators who are serving the IoT/M2M market.

PTCRB has re-accredited CETECOM as one of the few global laboratories to perform the certification testing related to PTCRB standards. CETECOM holds the PTCRB accreditation for over a decade now and operates PTCRB accredited facilities in Europe, North America and Asia, offering the full line of PTCRB certification test services.
