

WINDSOURCING.COM – The Procurement Platform for the Windindustry

WINDSOURCING.COM is a quality online platform, where wind turbine manufacturers as well as for the wind farming and service community have been buying and selling parts and services since April, 2011.

With immediate effect, **WINDSOURCING.COM** offers advertisers a flexible, streamlined, easily searchable procurement platform that their potential clients can easily navigate, whether in search of spare parts, or other products. Advertisements can be independently created and updated in real time.

“**WINDSOURCING.COM** is the first platform of its kind on the market, and we look forward to contributing to streamlining the wind industry’s procurement process. Operators, service providers as well as OEMs are welcome to use our platform to search for spare parts, place inquiries or offer their products on sale.” says Stefan Weber, founder of the **WINDSOURCING.COM** platform.

WINDSOURCING.COM offers maximum flexibility for suppliers and servicers alike. The **WINDSOURCING.COM**-team can handle an advertiser’s project from start to finish, or, if they so choose, each advertiser may register for the quick and easy log-in feature to maintain their project themselves. “This reduces the advertisers’ cost and allows total flexibility”, Weber adds. The **WINDSOURCING.COM** serves buyers, sellers, manufacturers and service providers in the wind energy industry.

The **WINDSOURCING.COM**-Team consists of experienced purchasing and engineering professionals who are familiar with procurement processes. **WINDSOURCING.COM**’s expert staff can direct site visitors to a more effective experience “It is fundamentally important not only to present a pure platform, but to offer professional background procurement processes as well!” says Weber.

An increasing number of suppliers use the **WINDSOURCING.COM** platform to introduce potential clients to their products and services. “We’re convinced that **WINDSOURCING.COM** is an important sales and procurement platform for all participants in the wind industry” says Weber.
