

American Express accredits CETECOM for two additional type approval activities

Summary: American Express has issued two additional accreditations, which allow CETECOM to offer Expresspay – Terminal Level 2 and Kernel C4 – Terminal Level 2 Type Approval activities to our clients.

January 28, 2016 / Saarbruecken, Germany – CETECOM, the premiere wireless test and certification lab, is proud to announce that American Express accredited CETECOM to offer two additional Type Approval activities to our customers.

CETECOM is now accredited to perform testing and certification for

- **Expresspay – Terminal Level 2**
- **Kernel C4 – Terminal Level 2**

“These two accreditations increase our already broad service portfolio in the SmartCard area,” says CETECOM CEO Wilfried Klassmann. “It helps us to strengthen our position as one of the top SmartCard laboratories globally.”

The two new American Express accreditations improve an already wide [CETECOM SmartCard service portfolio](#).

About CETECOM

For over twenty years, CETECOM has been renowned as an independent test laboratory for mobile phones and other wireless devices. With over 400 employees and test labs in Europe, North America and Asia, CETECOM offers a unique service portfolio servicing the entire range of cellular and consumer wireless products. CETECOM is a leading test and certification lab for smart cards, RFID and NFC applications.

CETECOM provides testing services, consulting and training for wireless technologies: GSM, WCDMA, LTE, CDMA, Bluetooth, Wi-Fi, NFC and other systems. The company also performs a wide range of testing in the areas of mobile software applications, OTA, SAR, FCC, EMC, field trials, acoustics, batteries and accessories. CETECOM participates in the development of global standards and test specifications.
