

Distec Continues Growth Path

Distec Will Present Innovative TFT System Solutions at Integrated Systems Europe 2018 in Amsterdam

Germering (Germany) January 15, 2018 – Distec GmbH - leading German specialist for TFT flat screens and system solutions for industrial and multimedia applications – will continue their successful course in 2018: "With new digital signage projects by our loyal and satisfied customers, as well as new purchasers including reputable players in the retail sector, Distec has generated a two-digit growth in sales and earnings as of the end of 2017," stated Axel Schaefer, Head of Division Monitor Solutions of Distec GmbH. "In addition, order intake for 2018 is already very promising." Over the past year, the integration of Distec into Fortec AG has been completed. As a member of the Fortec Group, Distec may now access the products, services, and knowhow of an extensive high-tech enterprise network and is thus well-positioned for future challenges. "We see our advantage in our proximity to the customer. Our individual support and service for optimized, customized display solutions in combination with the persistent rising demand for digital signage systems for industrial and POS promise continuing growth and success."

The Customer in Focus: POS-Line IoT, Video Wall, UHD, Fire Prevention, HighBright, and Easy Front Installation

As a reliable partner for digital signage system integrators, Distec will present their broad portfolio of innovative TFT system solutions at Integrated Systems Europe (ISE), the international trade show for audiovisual and electronic integration. On February 6 to 9, 2018 at stand N182 in hall 10 in Amsterdam, Netherlands, the display expert will put their focus on customer-specific hardware solutions for TFT displays for industrial, commerce and retail:

- The IoT-compliant **POS-Line IoT** monitor is based on Raspberry PI and is perfectly suited for cost-efficient retail 4.0 applications. The Artista-IoT controller card provides comprehensive functionality with direct control, 100 Mbit Ethernet, real-time clock, and special functions such as DICOM pre-set, gamma correction, and color calibration. It can easily be integrated into existing Windows and Linux environments.
- The features of Distec's cost-efficient **Video Wall** lie in its high quality, thanks to the most modern 4k control and factory color and brightness calibration. It results in an even image with all monitors in full HD resolution. A further characteristic is the simple installation, with only one PC/media player and one single cable.
- Distec integrates **UHD Displays** into high-quality digital signage.
- The fire-resistant and flue-gas-optimized **BLO Monitors** stand the test as information displays in sensitive areas with stringent fire protection requirements such as escape routes, stairways and on the opposite side of elevators in, for example, public buildings, hotels, and production halls.
- **HighBright TFT Displays** by Distec are equipped with powerful LED backlight and are exceptionally bright. In sunlight or very bright ambient light, they still keep their color and contrast, providing a perfect display.
- Distec simplifies wall mounting by providing **Easy Front Installation** for front mounting.

About Distec

Distec is a company of the Data Display Group (www.datadisplay-group.com), the worldwide operating specialist for TFT flat screen and system solutions for industrial, multimedia and digital signage applications. Located in Germering near Munich in Germany, the company designs, produces and sells innovative solutions and a full range components, displays and services. Data Display Group supplies innovative Green IT solutions based on their hardware platforms and their own software to control the TFTs of partners Samsung, Innolux, Kyocera, and Mitsubishi as well as selected panels from other manufacturers. These system solutions - from assemblies and kits up to finished OEM products - are developed in their own R&D centers in Germering (Germany) and Ronkonkoma (NY/USA). The range of services includes customized developments and adaptations, product finishing and assembly of monitoring systems as well as the production of finished products and a complete after-sales service with RMA, repair and technical support. Since 01/01/2016, Distec is a member of the Fortec Group with access to products, services, and expertise of a large high-tech company network, which makes a perfect complement to the product portfolio.
