O3SIS strengthening Tier-1 Carrier footprint in Ireland

O3SIS launches next-generation Messaging Service including Over-The-Air Address Book Synchronisation

Overath, Germany, February 18 2009, O3SIS AG, a leading provider of mobile messaging, email and synchronization solutions is pleased to announce that it has deployed the next generation of a popular Messaging Service with a Tier-1 mobile operator in Ireland. The new service offers advanced functionality including Address Book Phone backup and handset synchronization.

The contract represents one further proof of O3SIS' ability to capitalize on its excellent customer references from existing Tier 1 operator deployments. O3SIS extended its market footprint in Europe which is the key global market region for mobile data applications.

Utilizing O3SIS Living Communication Suite products, one of the most successful and popular consumer services in Ireland is reinvented by adding a range of new innovative features. It allows sending and scheduling of text messages up to 1000 characters. Sending to groups now provides a new, rich user experience with an integrated Address Book where groups can be set up for easier texting to multiple recipients. The new Address Book allows the subscribers to backup and synchronize their mobile phones and manage up to 10,000 contacts including images and multiple entries for phone numbers, emails, addresses, and more. Building on the O3SIS Living Address book products, the operator has a now a powerful launch-pad for additional online messaging services available which will be introduced in the near future.

Dirk Dörre, O3SIS' CEO said: "We are very pleased to provide an enhanced messaging and synchronization solution to set new standards in one of Europe's most competitive markets. Advancing an already popular service to a new level of user-experience is a further milestone which fuels our ambitions to keep and strengthen our achieved position as a global leader in data synchronization and messaging solutions."
