

PRESS RELEASE

EMAG Holding very satisfied with LambdaNet's VIPNet

User friendliness, security and efficiency convince customers

Hanover, 25. Mai 2011. EMAG Holding GmbH, a worldwide leading supplier of machines and manufacturing systems for the machining of chucked, shaft-type or cubic components, will continue to rely on VIPNet, a virtual private network (VPN) provided by LambdaNet Communications Deutschland AG in the future as well. EMAG has been using a VIPNet provided by LambdaNet since 2007. Now the contract was extended until 2013.

The VIPNet based on MPLS technology networks 24 EMAG locations in seven countries.

In addition to a backup solution, the VPN features central Internet connections as well as a firewall managed by LambdaNet in order to prevent unauthorized network access. Furthermore, LambdaNet's

specialists actively monitor the VIPNet. The VPN is specifically tailored to the requirements of EMAG and is very flexible with respect to location modifications and network extensions.

"We selected the solution provided by LambdaNet several years ago, as it completely meets our requirements with respect to user friendliness, security and efficiency," says Bernd Rittman, IT Department Manager at EMAG Group. The success of our cooperation and the decision to extent the contract by an additional three years is due to the product offering and the project team at LambdaNet, which always handled our needs in a competent and fast way".

LambdaNet's VIPNet offers connections with data rates from 2 Mbit/s up to 10 gigabits. Thus, branch locations as well as large data centers can be efficiently connected. Variable billing models, permanent network monitoring, complete project management responsibility, optional traffic classes as well as the realization via LambdaNet's high-performance optical fiber network ensure a powerful package for individual communication processes for the customer.

About EMAG Group

The EMAG Group delivers worldwide – with about 1,600 employees – machines and manufacturing systems for the machining of chucked, shaft-type and cubic components using numerous machining technologies. Whether turning machines, grinding machines, hobbing machines, laser welding machines or machines on a electro-chemical basis – the EMAG Group offers the optimal manufacturing solution for every customer requirement – for medium to high volume batches.

Enjoying a long tradition, the EMAG Group with its headquarters in Salach can revert to an extensive experience from many subsidiaries united under one umbrella. The EMAG Group offers its customers tailored and innovative manufacturing solutions on the highest level and covers almost the whole technology spectrum concerning the machining of metal components. With its variety of technology centers EMAG has become an important partner in the realization of complete process chains for the production of transmission, engine and chassis components. Flexibility, speed and the proximity to customers guarantee a unique competitive position.

About Lambda Net Communications Deutschland AG

LambdaNet Communications Deutschland AG is a premier provider of telecommunication and internet services. LambdaNet was founded in 1999 and is headquartered in Hanover, Germany. Well-known customers, namely network operators, internet service providers, industrial corporations, banks and insurances, service providers and retailers rely on LambdaNet's services. LambdaNet operates one of the most sophisticated fiber-optic and IP/MPLS networks in Europe, covering more than 40 cities in 11 countries, including metropolitan networks to 5 major European business centers. LambdaNet provides global VPN solutions based on a network of cooperation partners. The company's service portfolio includes state-of-the-art IP/MPLS data services, high-availability internet services in tegrated voice services, bandwidth transmission services up to 10 Gigabit per second as well as hosting services based on LambdaNet's 25 data centers.
