

## ITW SWITCHES TURN ON NEW INDUSTRIAL SWITCH RANGE

ITW Switches announce the new H48M, H57M and H58M series

ITW Switches have released their new Industrial Pushbutton switch range. The H48M, H57M and H58M Series SPDT Pushbutton Switches offer robust High Current switching for today's industrial applications.

The H48M, H57M and H58M Series have a 10A current rating and are available in 16mm, 19mm and 22mm Diameter bodies made from Stainless Steel, Aluminium or Zinc Alloy with Chrome or Black Nickel plating.

Standard illumination options available are Halo (Ring), Centre Spot and Standby Logo with LED colours of Green, Red, Amber, Blue, White and Yellow. Non illumination versions are also available and all H48M, H57M and H58M are IP67 Panel sealed.

The rugged design and 3 diameter options make the H48M, H57M and H58M ideal for use in markets such as Equipment/Machine Control, Medical, Security, Heavy Automotive and Mil-Aero.
