Layer2

FileMaker Codeless Data Integration and Synchronization

Features & Benefits

The Layer2 Cloud Connector connects your local FileMaker data to Microsoft SharePoint, Office 365, Dynamics CRM/ERP, Exchange, SQL databases and 100+ more systems:

- **No programming required:** Just select and setup the data provider, enter connection string and data query. No installation or customizing at FileMaker or other data sources required.

- **Reliable architecture:** A connection is established only for data synchronization between the end-points – not for user interaction.

- **Secure data connection and transfer:** The connector runs where your data resides today - on any Windows server or client inside your corporate network with Internet connectivity available, or in the cloud. No data is exposed to any 3rd party.

- **High performance:** Works great with large data sets.

- **100+ data sources supported:** ODBC, OLEDB, OData, .NET-based providers, file content (Excel, XML, CSV), File System Replication, SQL Server, Oracle, MySQL, IBM DB2, IBM AS/400, IBM Informix, PostgreSQL, FileMaker, Microsoft SharePoint, Office 365, OneDrive for Business, Dynamics NAV / CRM / AX, Exchange, Active Directory, Lotus Notes, SAP, Web Services etc.

- **Data providers for SharePoint/Office 365, OData, File System, XML/RSS, Exchange, SOAP included.** Vendor specific or 3rd party data providers supported, e.g. for any SQL or social media.

- **100% compatible to** *ALL* **Microsoft SharePoint Server 2010 / 2013 / 2016 offerings:** On premise, externally hosted, Office 365, OneDrive for Business, or sandboxed.

- **Mobilize your local data via Office 365.** Send notifications or start workflows in SharePoint on local FileMaker data change. View and edit on any device.

> *"I am thoroughly impressed with your Cloud Connector software. It is an excellent concept, has extremely comprehensive functionality and is easy to configure."*
