

## PRESS RELEASE

January 2010

### *New ODP 1000 POS printer from POSLIGNE®: a subtle blend of contemporary minimalist design and black satin lacquer finish*

Runcorn & Lisses – January 3<sup>rd</sup> 2010: The **AURES Group**, which manufactures **POSLIGNE®** point of sale terminals and systems, has unveiled its new thermal receipt printer specially designed for points of sale and service - the **ODP 1000**.

*This stylish printer is both elegant and discreet. Its minimalist lines are done out in a deep, intense black, bringing to mind delicate satin and the mirror effect of refined Chinese lacquer.*

This receipt printer's highly compact format and small footprint mean that it can find a place at any till point; in addition, its design benefits from a *front-mounted printout*, ensuring it's splash-proof and well-sealed all round – a very worthwhile quality in certain adverse environments where splashes, dust and crumbs are common – *such as kitchens, restaurants and bars in the hotel and catering industry, hospitality sector or bakery outlets.*

**POSLIGNE®'s ODP 1000** boasts a print speed of 160mm/second, automatic paper loading and cutting, and an integrated dual interface (serial and USB ports). It's ready for use out of the box, with all the required cables supplied.

## Key features of the ODP 1000

- contemporary black lacquer finish from POSLIGNE®'s **'Black Piano'** collection
- highly ergonomic compact format fits anywhere
- receipt output on the front face (rather than on top of the printer) for enhanced splash-proof design
- integrated dual interface: RS232 C serial and USB ports
- print speed: 160mm/sec
- configuration utilities available
- ready out of the box, with all cables supplied.

<u>Print method</u>	<u>direct, thermal</u>
<u>Print speed</u>	<u>160mm/sec</u>
<u>Effective print width</u>	<u>72mm max. (512 dots/line)</u>

### About the AURES Group

Founded in 1989 and listed on Euronext Paris since 1999, the AURES Group manufactures point-of-sale EPoS terminals and systems as well as related peripherals, which it markets under the POSLIGNE® brand.

Acclaimed for its reliability and performance, this PC-based, open-system hardware is designed to provide management and till functions in specialist food and non-food stores, mass retail outlets, and the hotel and catering industry, as well as all other points of sale and service.

With EPoS featuring innovative designs and a wide range of fully interchangeable colours, the AURES Group is positioned as the most creative leader in its field.

Distribution of POSLIGNE® systems is based out of AURES' headquarters in France, the Group's three subsidiaries in the United Kingdom, Germany and the USA, and a distributor network present in over forty countries.
