

Lantech IES-0005T-PoE

5 10/100TX Slim Type Industrial Switch with one PoE

Passive PoE mode B Support

Wide-range redundant power with polarity reverse protection

Provides surge & ESD protection

The Lantech IES-0005T-PoE is a slim type 5-Port 10/100TX Industrial Switch with one PoE injector which supports PoE mode B (Pin assignment 4,5,7,8) at same voltage input and output(12V~48VDC).

The IES-0005T-PoE is designed to meet the demands of industrial environments, comes packaged in a robust IP 30 housing and has been tested extensively to meet Industrial EMI and EMC standards. The ESD, surge, and power polarity reverse protections, making IES-0005T-PoE work well without interruption.

The Lantech IES-0005T-PoE is the best to use in Industrial automation, Transportation, Semi-conductor factory, Heavy Industrial factory and other factory assembly lines.
