IHSE and Vizrt demonstrate seamless compatibility at IBC

Oberteuringen, September 10, 2013 – Real-time visualisation software from Vizrt meets KVM from IHSE at the company booths at IBC 2013, the largest European Broadcast trade show in Amsterdam. Both manufacturers demonstrate mutual compatibility of their products based on real scenarios.

Vizrt visualisation software is widely used in broadcast industry. A typical scenario is the real-time ingest of live data and video into the on-air video stream. Therefore, both the Vizrt control PCs and the Viz Engine rendering engines for monitoring the streaming signal need to be remotely accessed from the studios and control rooms. Due to the requirement for high video quality and instant access, Vizrt and IHSE have worked together to optimize the IHSE KVM technology and operational concept for this typical Broadcast application.

While the Vizrt booth (7.A10) will demonstrate the instant KVM switching between Vizrt control PCs and Viz Engine graphic engines based on an eight port IHSE Draco tera compact matrix, IHSE (7.C10) will show the seamless integration of Vizrt user stations with other broadcast applications.

The demonstration will be available at IBC in Amsterdam, 13-17 September 2013.

About Vizrt

Vizrt provides real-time 3D graphics and asset management tools for the broadcast industry - from award-winning animations & maps to online publishing tools. Vizrt's products are used by the world's leading broadcasters and publishing houses, including: CNN, CBS, Fox, the BBC, BSKyB, Al Jazeera, ITN, ZDF, Star TV, Network 18, TV Today, CCTV, NHK, The Globe and Mail, Times Online, The Telegraph, and Welt Online. Furthermore, many world-class production houses and corporate institutions such as the Stock Exchanges in New York and London use Vizrt systems.

Vizrt is a public company traded on the Oslo Main List: VIZ, ISIN: IL0010838154. For further information please refer to www.vizrt.com.

About IHSE

IHSE is a leading developer and manufacturer of advanced KVM devices in global demand. KVM stands for Keyboard, Video, and Mouse. KVM technology allows switching and extending of these three primary computer signals and many else, e.g. DVI, HDMI, digital audio or USB. At their headquarters near Lake Constance, Germany, IHSE manufactures matrix switches for operating and switching between computers and consoles, as well as extenders for visually lossless signal transmission, with 30 years of experience.

IHSE products have been certificated for outstanding manufacturing quality, operability, resilience and enormous transfer speeds. Many renowned institutions across vertical sectors, including Broadcast, Post Production, Banking, Healthcare, Maritime, Air Traffic Control and Government rely on KVM solutions made by IHSE, Germany.
