

Organic Electronics Conference and Exhibition 2006

25-27 September 2006

Frankfurt Sheraton Hotel and Towers Conference Centre
Frankfurt, Germany

Now in its fourth year, the **Organic Electronics Conference and Exhibition** (OEC-06) is the premier international event for researchers, manufacturers, and investors in the organic semiconductor and plastic electronics industry.

OEC-06 aims to cover the whole of the industry including:

- integrated circuits
- photovoltaic
- sensors
- RFID
- smart packaging
- displays
- signage
- lighting
- backplanes
- memory devices
- deposition systems:
 - ink-jet
 - vacuum
 - gravure
 - roll-to-roll
 - flexographic
- patterning
- materials
- encapsulation
- inline manufacturing

The conference will be divided into three industry tracks, and this year will feature a peer-reviewed academic track for the first time. Pre-conference workshops will take place on 25 September.

For more details about the programme, as well as exhibition and sponsorship opportunities, visit www.oea-osc.com.

Delegate services

Benefits for delegates include:

- High quality presentations
- Conference proceedings available on paper and CD at the start of the conference
- Refreshments and full lunch provided on both conference days
- Drinks reception and gala dinner on evening of 26 September
- Time to visit the exhibition and network with other delegates
- Convenient location (adjacent to Frankfurt Airport)

Background

The three previous conferences in the series (OSC-03, OSC-04 and OSC-05) were run by cintelliq Ltd. This year's conference is being jointly promoted by **cintelliq** and the **Organic Electronics Association**.
