

## **exceet at the M2M Summit 2015**

- Trusted ecosystems for maximum possible security in holistic M2M and IoT projects
- exceet and M2M Alliance together launch the “Initiative for the Development of Approaches for a Successful Digital Transformation”
- Wide range of industrial routers

**Rotkreuz, Düsseldorf, 03. Sept. 2015 – The M2M Alliance is awaiting its guests for Europe’s largest annual meeting that takes place from September 8-9, 2015, at the Congress Center Düsseldorf. Against this background, exceet Secure Solutions AG and LUCOM GmbH, both members of exceet Group, will come up with many innovations in the areas of machine-to-machine (M2M), Internet of Things (IoT) and Industry 4.0 (stand 17). A special focus lies on the creation of a highly secure sphere of trust for every participant of an M2M or IoT ecosystem (trusted ecosystem).**

„Smart & Secure: Define Your Value. Transform Your Business” is the motto of this year’s M2M Summit, and thus put emphasis on benefits, the digital transformation of business models as well as IT security. From security consulting to the development of secure element devices and the establishment of Trust Management Infrastructures (TMI) to secure services, exceet Secure Solutions will showcase its extensive know-how as an end-to-end provider of secure connectivity solutions.

### **Joint Initiative of M2M Alliance e.V. and exceet Secure Solutions AG**

Furthermore, visitors to the exceet stand will learn more about how to successfully master the digital transformation and thus open up new business models, develop smart connected products and offer additional services for new applications. In order to enter into dialog with organizations, exceet Secure Solutions under the aegis of M2M Alliance has launched the “Initiative for the Development of Approaches for a Successful Digital Transformation”. This working group provides a unique platform that is intended to encourage exchange between suppliers and users about the opportunities and challenges of the digital transformation. But, above all, it should enable organizations to develop an individual digital strategy and to successfully implement it into practice.

### **M2M Communications Across All Boundaries**

Along with the solution competencies by exceet Secure Solutions, LUCOM will present its wide range of industrial routers. Whether it is the new modem emulation router, or the spectre v3 router or other device series – LUCOM will show what possibilities do visitors have to prepare for current and future IoT applications and pave the way to Industry 4.0. By integrating standard devices, the products and services of LUCOM provide an ideal complement to exceet’s M2M and IoT portfolio.

### **Second Part of the M2M and IoT Study**

After publishing the M2M benefit analysis on the occasion of the M2M Summit in October last year, exceet Secure Solutions in cooperation with M2M Concepts now announces the second part of their

M2M and IoT study for the last quarter of 2015. Under the heading of “M2M & IoT – From Benefit to a Successful Digital Transformation”, the study examines, inter alia, what digital changes M2M and IoT projects have caused and how smart connected products affect several industries and business units.
