

# PRESS RELEASE

## AMS Technologies Appoints New Managing Director for the Nordic Countries

**Martinsried, 07 June 2011 – AMS Technologies, Europe’s leading consultancy and distributor in Optical, Power and Thermal Management Technologies announces the appointment of Knut Pogost as Managing Director - Nordic.**

Knut has more than 15 years of technical sales and executive management experience having lead successful teams at electronic distribution and EMS solution companies such as Future Electronics, Note AB and Kitron ASA.

“We want to strengthen our relationships with existing customers and better explore the Nordic markets together with our suppliers and partners” noted Jan Meise, CSO of AMS Technologies. “With Knut’s extensive experience we will be able to provide local support and responsiveness for our future growth in the Nordic.”

AMS Technologies’ university-educated sales engineers fully comprehend and competently apply key technologies to transform customer needs into cost-effective solutions. Together with almost 30 years of entrepreneurial spirit, AMS Technologies provides blue-chip companies, research institutes and leading-edge technology start-ups with an unparalleled level of technical competence.

### **AMS Technologies – where technologies meet solutions**

AMS Technologies is Europe’s leading solution provider and distributor for Optical, Power and Thermal Management Technologies, with almost 30 years of experience to date and currently serving more than 1000 European customers.

AMS Technologies has been delivering solutions into a variety of high-tech markets, including renewable energies, medical, defence & aerospace, telecom & datacom, research & scientific and various other industrial segments. Our customer base consists of Europe’s largest leading technology corporations, a network of universities and research institutes as well as the most promising start-ups.

We thrive by working in a ‘customer first’ environment. Our pan-European customers are serviced from a network of local offices in Germany, the UK, France, Italy, Spain and Norway, with a focussed operations and logistics centre located in Munich, Germany.
