

Measurement Devices for Optical Fibers

New SmartOTDR from Viavi

Optical fibers infiltrate deeper and deeper into access networks – flexible test solutions are required to quickly qualify installations and identify disturbances. LASER COMPONENTS provides the new SmartOTDR from Viavi: an inexpensive and easy-to-operate handheld unit that is also suited for inexperienced technicians.

The SmartOTDR combines all important test options for optical fibers into one unit, including OTDR measurements, connector surface analyses, attenuation measurements, and visual fault locators.

Cloud-based connection functions make it easier to store and manage measurement results and facilitate quick access to said results, no matter where you are in the network.

The light, ultra-compact design and extended battery life of up to 20 hours increase the SmartOTDR's efficiency in field applications. The SmartOTDR is available in versions with one, two, or three wavelengths (1310 nm, 1310/1550 nm, or 1310/1550/1625 nm).

Trade Shows

Optics & Photonics Sweden, Oct, 28 - 29, 2015, Alba Nova University, Stockholm, Sweden
Elmia Subcontractor, Nov, 10 - 13, 2015, Jönköping, Sweden
BiOS 2016, Feb, 13-14, 2016, Moscone Center, San Francisco, USA, **Booth 939**
Photonics West 2016, Feb, 16 - 18, Moscone Center, San Francisco, USA, **Booth 2023**
DCS 2016, Apr, 19 - 21, 2016, Baltimore Convention Center, USA
analytica, May, 10-13, 2016, Messe München, Germany **Booth, A2.500**
Sensor + Test, 10. - 12. Mai 2016, Messe Nürnberg, Germany, **Hall 1, Booth 256**

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 170 employees worldwide.
