

AceBackup – Backup Everywhere!

Innovative, reliable, trend-setting - **AceBackup** the new valuable tool for securely and easily backing up your data

Description:

AceBackup makes it much more easier to create completely secure backups of your confidential data – AceBackup gives you the freedom to store your data anywhere and anytime on a top level!

Important Features of AceBackup:

- Easy to use interface
- Restore and store files like in the Windows Explorer
- In AceBackup there are two project types: Archive and backup projects
- Automatic backups with the help of scheduling functions
- Several encryption algorithms protect your data
- Backup several versions of one file
- Import project and Verify project wizard
- Restore files in the original or any other folder

New Features of AceBackup 2004:

- AceBackup projects may have several volumes with different target locations - simultaneous backup on local storage devices as well as on remote FTP server
- Different compression levels for an AceBackup project
- External applications that should be executed before or/and after processing an AceBackup can be specified
- Both strong encryption of file content and encryption of file names are possible
- Files and folders can easily add to an AceBackup just like in the Windows Explorer
- Store your data on CD or DVD
- Manage several backup volumes in a project file
- New user interface with 3 different themes
- Many other improvements

Prices:

- AceBackup Trial Version for 30 days
- AceBackup – Single User License 29,95 €
- AceBackup – Site License 149,00 €
