

With *Heat Pipes* Tagan needs no summer break!

Ahrensburg, July 2010:

After a long and intensive development finally the time has come: **PipeRockIII** is the name of the new, modular Tagan power supply series, which will be available from mid-August in specialised stores. The first units with an output of 700 Watt have already arrived in the warehouse. Later, the series will be completed with 800, 900 and 1000 Watt models.

The brand new power supplies that meet *80Plus® Silver* requirements are equipped with a new heat pipe technology, which improves the cooling system enormously. The heat pipes lead away the heat from the voltage converters and forward them directly to the cooling fins, which are placed in the air flow. Thereby, the large 13.5 cm fan will be relieved greatly and can rotate correspondingly slowly which causes little noise, even under hot summer temperatures. In addition, the buyers enjoy a very long life time of the less stressed components.

Four independent +12 V rails provide individual power to the connected devices and therewith stabilise the system. The power supplies operate with an efficiency of more than 85% extremely economically. Heat losses are minimized and far less power is needed - that saves money and conserves the environment. All models of the *PipeRockIII* series meet already the new EuP requirements and work in stand-by mode ecologically as well.

A total of 15 ports for peripherals are available. The necessary PCI-Express connectors are supporting current graphics cards as well as CrossFire and SLI configurations. Practical ribbon cables with modular, fool-proof plugs make a clean cable installation a breeze. They also maintain order and optimise the airflow inside for a better cooling of all elements.

Of course, there are integrated protection circuits against over voltages, short circuits and high currents in order to protect the valuable components.

The PipeRockIII power supplies are delivered in an attractive retail packaging. They are marketed exclusively by MaxPoint Handelsgesellschaft mbH. The **TG700-BZIII** is offered for the recommended retail price of 129 €

About MaxPoint Handelsgesellschaft mbH

MaxPoint is a leading and international operating producer and importer of innovative IT-peripherals and LED-lamps with headquarters in Ahrensburg near Hamburg (Germany). Established in 1993, the company attracted repeatedly attention due to groundbreaking new product developments and awards. At present, the MaxPoint Group consists of several divisions concentrating independently from each other on their particular clientele, but offering a well-adapted overall portfolio. The most important brands are Tagan, SilverPower, Aplus, RackMax and KeySonic.

The logo for PipeRock III features the brand name in a bold, italicized, sans-serif font. The letters are filled with a yellow-to-orange gradient and have a blue outline. To the right of the text are three vertical, parallel bars of the same color and gradient, suggesting a heat pipe or cooling fin.
