Release date : **immediate**

Cliff S2C Stackjack® Series Jack Sockets add Rugged Halves Space Requirement

The Stakjack® saves PCB space and allows a 100% increase in connector density in a cost effective way. It comes with an innovative castellated nut designed to match our Cliff terminals and may be tightened by a key.

The S2C jack sockets incorporate the same innovative design features of the more compact S1 Series, but in a body size intended to give a more rugged jack. The S2C allows users of the larger body size jacks to halve PCB space needed by using the stacked feature. As a further enhancement there is also a new variant with decorative ring insert. All the usual accessories such as nuts and washers can be used, low noise contacts are standard on this new model.
