Service Center

Repairing Fiber Optic Splicers in Germany

Japanese fiber optic splicing units can be repaired in Germany: LASER COMPONENTS is the authorized service center for all FITEC Furukawa cleaving and splicing units. Annual maintenance checks are also performed. The units will be cleaned, realigned, and updated with the current firmware. After just a short amount of time they will be back to the customer - regardless whether they are picked up onsite or shipped back.

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in four different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the USA. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 160 employees worldwide.
