## Press Release

### Optomechanical Mounts

#### New Interactive Catalog Shows General Overview

LASER COMPONENTS not only offers coated laser optics but also proper mounts for optical benches. The variety of the optomechanical components is extensive: it includes rail and rod systems as well as different mounts and positioning systems. For an overview of all products, a catalog has been put together.

The interactive catalog is available exclusively online because it is more than just a leaflet. Each optomechanical element introduced contains detailed information available upon a "click" of the mouse. Test this new format!

#### Trade Shows

Security + Defence, Sept., 24 - 25, 2013, Internat. Congress Center Dresden, Germany

#### The Company

LASER COMPONENTS is specialized in the development, manufacture, and sale of components and services for the laser and opto-electronics industries. With sales offices in four different countries, the company has served its customers since 1982. In-house production at six locations in Germany, Canada, and the USA began in 1986 and is meanwhile responsible for about half of its turnover. Currently, the family-run business employs more than 140 people worldwide.
