Everything for the Rallye!

Vibrant range of products for the R 1200 GS Rallye

With the current R 1200 GS Rallye, BMW is targeting GS riders with an affinity for off-roading and gifting them with a few good extras too. BMW motorcycle accessory specialist Wunderlich shows how you can take a good thing and make it a little bit better.

The team from Sinzig demonstrate their bundled competence in all things protection and ergonomics with the GS kept in the BMW motorsport colours. Wunderlich has thus give the Rallye an efficient engine and tank protection bar, for example, which is also readily available in the original blue frame colour. There's also protection for the expensive main headlight in the form of a fortified headlight grid.

Rallye riders can get comfortable behind Wunderlich's "Marathon II" ERGO screen. The name reflects the range here. Furthermore, the optional clear or smoke-tinted screen lets you ride away through all turbulences and over the horizon. A handlebar riser that raises the handlebar by a pleasant four centimetres lets the rider pilot their GS with even greater ease.

Wunderlich's ERGO seat promises mutual enjoyment for the complete GS complement. Whether at the original height or lower, with or without seat heating, your rear will thank you after just a few kilometres.

In addition to all of this, Wunderlich of course also offers a massive range of accessories and you can find all the details in the Sinzig team's clearly laid out online shop at www.wunderlich.de
