### ***Renewable Energy Sources are our future!***

***REECO Poland invites anyone interested for another edition of International Trade Fair for Renewable Energy and Energy Efficiency InEnerg®, taking place on 13-14.04.2016 at the Municipal Stadium in Wrocław.***

Thanks to the law on RES, signed this year and already having entered into force partly, companies in the green energy sector renew their investments. The RES market is stabilizing. Experts estimate that by 2030 half of electricity in Poland might be derived from renewable energy whose development might help to create over 100,000 new jobs. Many people still do not know that the energy from renewable sources is actually available to anyone. Each of us can produce environmentally friendly electricity in our households and, in addition to this, have a double benefit from it. This is due to the fact that the produced energy will fully satisfy our energy demand, and any excess of the produced energy can be sold to the electrical grid in accordance with the feed-in tariffs effective from January 1, 2016.

Entering year 2016, a promising year for RES development, REECO Poland organizes another spring edition of InEnerg® trade fair in Wrocław. The aim of the event is to create a place where you can draw both theoretical and practical knowledge through an exhibition and a series of specialized conferences and industry forums.

The fair topics focus mainly on renewable energy sources, such as: photovoltaics, heat pumps, bioenergy and wind energy. The event will feature presentations of innovations in the RES industry and traditionally it will cover issues concerning energy efficiency and energy-efficient building.

The fair organizer cooperates with the most prominent organizations and sector media, which guarantees the transfer of expertise and exchange of valuable experiences directly from the industry experts. *Let us not waste time and take advantage of the potential of RES development* - with these words Project Manager Małgorzata Bartkowska encourages to participate in this exceptional event.

Admission to the fair is free of charge for all visitors who make prior registration on the following website: <http://www.inenerg.com/486.html>.

## Press release

The fair organizer is REECO Poland, part of German REECO Group, which has been organizing its trade fairs since 1997. Thanks to the international orientation of the events organized across Europe, REECO provides the energy industry with the access to new markets, creates a network of contacts between national and international partners, provides important knowledge of the latest energy technologies, current market trends, as well as national procedures for the financial support and license issuing.
