## NEWS @ ENGELKING

**Responsible editor:** Thimo Hamma  
**Release date** : **immediate**

### Fuseholders up-rated to 16A

Seventeen styles of Bulgin's fuseholders are now carrying UL approval to 16A at 250Vac. Previously rated at 10A, 250Vac, UL (the USA based approval body) have extensively tested the range and increased the approval rating up to 16A 250Vac.

The increased rating is in addition to the approvals already held from VDE, CSA, SEMKO and IMQ and is testament to the quality of the products.

Manufactured from flame retardant nylon and polyester materials the fuseholders offer a choice of styles and protection categories (PC2 and PC3) for 1 1/4"x1/4", 1"x1/4" and 5x20mm fuses with a variety of mounting and carrier options including; drawer style, screw or bayonet cap, screwdriver or finger carrier release and screw or snap to panel fixing.
