

TRITEC – A Success Story of the Photovoltaic Sector

TRITEC, supplier of quality products in the area of Renewable Energies and system integrator, is celebrating 20 years of experience and with that numerous branches in the whole of Europe. TRITEC's origins began in 1987 in Switzerland with the implementation of the first Megawatt photovoltaic project. Today TRITEC is the leading photovoltaic company in Switzerland and one of the leaders in Europe. TRITEC continues to pursue its goal and also motto, the promotion of "energy for a better world", with enthusiasm and dedication, adjusting its services to the increasing public interest in renewable energies and to the market conditions.

Energy for a better world

Energy for a better world – is both incentive and motto for the TRITEC Group, for this motto contains the environmental aspects as well as the social and economic dimension of global energy supply. TRITEC offers its clients a one-stop shop for various services. It acts as product supplier, implements feasibility studies, designs, plans and realises photovoltaic installations of all kinds and sizes. In the new PV countries TRITEC furthermore provides training and coaching for the skilled workers in order to ensure the transfer of know-how.

TRITEC – References (selection)

1987–1990	Megawatt project. 333 solar power installations with 3 kW power each (Switzerland)
1991–1992	Realisation of the first solar power installation in the range of 20 kW for Elektra Birseck Münchenstein
1993	Realisation of the first fully roof-integrated solar power system with customised laminates
1994	Equipping of 40 alpine weather stations of the Swiss Meteorological Institute (SMA) with a stand-alone photovoltaic energy system
2000	Installation of the first solar power system in Basel in terms of the Solarstrombörse of the Industrielle Werke Basel (IWB) (Switzerland)
2004	Acceptance of bid for the construction of the world's largest solar power installation on top of the roof of a football stadium (Stade de Suisse in Berne, Switzerland)
2005	Realisation of the 855 kW solar power installation Stade de Suisse as the prime contractor
2007	Extension of the solar installation Stade de Suisse to 1.35 MW (world's largest solar power installation on a football stadium)
2007	ISES SolarCarport (Freiburg i.Br., Germany)
2007	Minergie P Wohnüberbauung Eulachhof (Winterthur, Switzerland)
2007	St. Jakob Stadium (Basel, Switzerland)
2007	Ikea, St.Gallen (Switzerland)
2007	Consultation and installation for Frank O. Gerhy's building in Novartis Campus (Basel, Switzerland)
