+ + + + + + + + + + + 50 Years of Multi-Contact! + + + + + + + + + + +

In 2012 we celebrate our 50th company anniversary. We'd like to take this opportunity to thank all our customers, partners and co-workers for the successful cooperation to date.

Successfully connected

Multi-Contact began as a family business in 1962 in Basle, and has since grown into a leading international electrical connectors manufacturer, operating business units all over the world. The company's success is based on a groundbreaking invention of it's founder, Rudolf Neidecker – the MC Multilam. The technology has been further developed and adapted to various fields of application over the years. The MC Multilam is characterized by high energy efficiency, reliability and a long lifespan, and it is core to our broad range of connectors for industrial applications, automation, photovoltaics, the medical industry as well as testing and measuring.

The many years of experience, our innovation as well as the versatility of the MC Multilam Technology allow us to flexibly answer to specific demands of various industrial applications. Our particular strength lies thus in developing customized solutions.

We thank our customers and partners for the successful cooperation until now, and together will lay the foundation for the next 50 years.
