

Sidestand light

Wunderlich ignites the sidestand

Fiddling around with the sidestand in the dark is not everybody's cup of tea. If the ground underneath the sidestand is not even or solid, the heavy bike quickly falls over. The consequences are expensive and potentially painful.

The appropriate solution can be found in the Wunderlich product range. The BMW motorcycle accessory specialists offer a sidestand light, consisting of a LED-light including holders and a connection cable. Mounting is simple, connection is performed via electric plug-in, so no soldering is needed. The discreet switch is linked with CanBus and turns off automatically once the ignition is turned off.

The practical LED-illumination is currently available for all liquid-cooled Boxer-models as well as for the current BMW six-cylinders. It is completely Made in Germany and comes with a 5-year warranty for 99.90 Euro.
