Stage Devil Wireless Guitar

For Rock Band® and Guitar Hero® on PC, PlayStation® 2 and 3

Weertzen, 18 February 2009 – SPEEDLINK®, one of Europe's leading brands for computer- and video game equipment, presents the Stage Devil Wireless Guitar. Using the five frets, the strum bar and the tremolo the gamers can let their hair down to sounds, riffs and accords played wirelessly.

The SPEEDLINK guitar is completely wireless and compatible with the popular games Rock Band® and Guitar Hero® and can be connected to a computer as well as to the PlayStation®2 and 3.

The 2.4GHz wireless technology allows delay-free wireless transfer of commands with a range of up to 10 metres. The Stage Devil Wireless Guitar is equipped with all the standard keys of a gamepad.

The controller registers the way the guitar is held because playing it vertically gives in certain gaming situations extra style bonuses. Other spectacular moves whilst rocking are left to the player's creativity. The guitar strap is height adjustable and exchangeable.

Thanks to the intelligent layout of the buttons the guitar is suitable for left or right handed use.

The Stage Devil Wireless Guitar will available as from February 2009. The recommended selling price is 59.99 €.
