

Password Depot - All your passwords under control!

Save all your passwords in a single password list.

Description:

You can access your passwords at any time, thanks to the intelligent and sophisticated functions of Password Depot.

Important features of Password Depot

- Password Depot is an **easy-to-use** and yet **powerful** password manager.
- Your files are encrypted by strong **encryption algorithms**.
- **Backup** of your password lists.
- **Auto complete action** that allows you to automatically complete fields on a web page with user name and password.
- **Import/export** of passwords from/to other password managers.
- You can copy to clipboard a password, its user name or URL **with one mouse click**, or drag & drop the password to the desired field in a web page.
- You can open a password's **website directly from the program**.
- The easy-to-use interface allows quick **location** of your passwords.
- **Friendly and easy-to-use interface**, similar to the Windows Explorer, that allows you to navigate the password lists.
