Engelking Introduces Large Size Vandalproof Pushbutton

In its renowned CS-Series of vandalproof switches, Engelking has introduced a new low profile range of stainless steel machined pushbuttons with protection class IP65. The switches have momentary contacts as single or twin microswitches each with N.O and N.C. contacts capable of currents up to 5A.

The mounting hole diameter is 25mm giving an outer diameter of approximately 27mm.

Additional versions with either ring or dot LED illumination in a variety of colours and voltages are also included in the product spectrum.

The switches are available on short lead times under part number CS008 for the non-illuminated versions, CSI008 for dot illumination and CSI007 for the ring lit versions.
