

Press release

EXPERIENCE THE FUTURE IN THE LABORATORY TECHNOLOGY!

FRITSCH is one of the internationally leading manufacturers of application-oriented laboratory instruments for sample preparation and particle sizing.

Laboratories worldwide count on our quality and

experience – for the fast industrial application as well as for the especially accurate research technology applications in the industry- and research laboratories.

Convince yourself and discover the FRITSCH-product range live during POWTECH!

Wir stellen aus/We exhibit:

**Halle 7
Stand 7-149**

Discover NEW innovations

Like our **Planetary Mill *premium line*** – the first Planetary Ball Mill with sunken grinding bowls. Brilliantly simple – brilliantly effective! This allows us to reach rotational speeds never known before and achieve ultrafine grinding results down into the nano range. Faster, simpler and safer than ever. A new dimension in high-tech milling!

Or our **Particle Sizing Instruments** – state-of-the art laser technology for an unique price performance ratio for each particular area of application and utilization. **An extra plus:** the special, patented FRITSCH measuring method by laser diffraction inside the convergent laser beam. **Your advantage:** a simple continuous adjustment of the measuring area as well as up to now unknown number of measuring channels.

Drop in – you will be surprised!

Our experts are looking forward to your questions and can advise you in all laboratory technology related enquiries.
