

## **Reveal Stored Internet Passwords**

Elcomsoft Internet Password Breaker instantly reveals Internet passwords, retrieves login and password information protecting a variety of Web resources and mailboxes in various email clients. The new password recovery tool supports instant password recovery for passwords, stored forms and AutoComplete information in Microsoft Internet Explorer, mailbox and identity passwords in all versions of Microsoft Outlook Express, passwords to all types of accounts and PST files in Microsoft Outlook, and passwords protecting email accounts in Windows Mail and Windows Live Mail. Apple Safari, Google Chrome, Mozilla Firefox (\*) and Opera Web browsers are also supported.

## **Features and Benefits**

- Instant password recovery for a variety of applications
- Supports all versions of Microsoft Internet Explorer, including IE7 and IE8
- Supports all versions of Microsoft Outlook and Outlook Express
- Supports Windows Mail and Windows Live Mail passwords
- Instantly recovers passwords cached in Apple Safari, Google Chrome, Mozilla Firefox and Opera Web browsers
- Reveals stored POP3, IMAP, SMTP and NNTP passwords for all supported applications
- Recognizes and works around enhanced security model of Internet Explorer 7 and 8
- Reveals Microsoft Passport information in Windows Live Mail
- Retrieves Microsoft Outlook PST passwords
- Recovers login and password information to a variety of resources

## **Instant Password Recovery**

Elcomsoft Internet Password Breaker works instantly and automatically. The password recovery tool detects installed applications, locates all available user identities and accounts, and reveals all cached information such as AutoComplete forms, pre-filled forms, logins and passwords protecting mailboxes, identities and user accounts.

## **Recover Passwords Cached by Internet Explorer**

Elcomsoft Internet Password Breaker gives instant access to information cached by Internet Explorer, including auto-login forms, cached logins and passwords, and allows changing or resetting IE Content Advisor passwords. The tool provides access to logins and passwords protecting all types of webmail accounts, blogs, forums, Internet stores and auction sites, and a variety of social networks.

## **Reveal Firefox, Safari, Chrome, and Opera Passwords**

Cached forms, login and password information stored in Apple Safari, Google Chrome, Mozilla Firefox (\*) and Opera Web browsers can be instantly recovered with just a few clicks.

## **Internet Explorer 7 and 8 Support**

Internet Explorer 7 and 8 improved the security model protecting cached passwords. Cached information is now encrypted with addresses of corresponding Web sites or resources to make access impossible without knowing the exact URL of a site. Elcomsoft Internet Password Breaker

can still access protected information by retrieving the list of recently visited Web sites from browser history, and retrieving cached information for resources identified.

## **Reveal Email Passwords**

Elcomsoft Internet Password Breaker instantly displays the original plain-text passwords protecting mailboxes, POP3, IMAP, SMTP and NNTP news accounts and user identities in a variety of Microsoft email clients. All versions of Microsoft Outlook, Outlook Express, Windows Mail and Windows Live Mail are supported, including Microsoft Passport passwords in Windows Live Mail. For all versions of Microsoft Outlook up to Office 2010, Elcomsoft Internet Password Breaker retrieves passwords protecting PST files.

(\*) If Mozilla Firefox has a master password set to protect password storage, the master password must be obtained before accessing cached information. Elcomsoft Distributed Password Recovery can be used to break Firefox master passwords.

## **Compatibility Chart**

<< Таблица поддерживаемых приложений как в остальных продуктах >>

#### Char45

Instantly reveal stored Internet passwords

#### Char80

Instantly reveal stored passwords to mailboxes and Web sites

#### Char250

#### Char450

Elcomsoft Internet Password Breaker instantly reveals passwords to Web sites, identities, and mailboxes stored in a variety of applications. Supporting all versions of Internet Explorer up to IE8, Firefox, Safari, Chrome, and Opera, all versions of Outlook Express, Microsoft Outlook, Windows Mail and Windows Live Mail, Elcomsoft Internet Password Breaker helps you retrieve the login and password information to a wide variety of resources.

#### Char2000

Elcomsoft Internet Password Breaker instantly reveals passwords to Web sites, identities, and mailboxes stored in a variety of applications. Supporting all versions of Internet Explorer up to IE8, Firefox, Safari, Chrome, and Opera, all versions of Outlook Express, Microsoft Outlook, Windows Mail and Windows Live Mail, Elcomsoft Internet Password Breaker helps you retrieve the login and password information to a wide variety of resources.

Get access to hidden information stored in popular Web browsers! Elcomsoft Internet Password Breaker will retrieve logins and passwords to Web sites, reveal AutoComplete information including login forms, and allows you to change or reset IE Content Advisor passwords in an instant. Apple Safari, Google Chrome, Mozilla Firefox and Opera passwords are a one-click affair. For Internet Explorer 7 and 8, the tool allows analyzing URL history to identify Web sites last visited and retrieves password information stored for those Web sites. IE password recovery will retrieve stored passwords and AutoComplete information to all Web sites, including webmail clients, Amazon, LinkedIn, LiveJournal, and a variety of social networks.

Elcomsoft Internet Password Breaker extracts stored password information from Microsoft Outlook, Outlook Express, Windows Mail and Windows Live Mail, including Microsoft Passport passwords. The password recovery tool allows you to access all types of mail account passwords, including passwords protecting POP3, IMAP, SMTP and NNTP accounts, as well as passwords protecting user identities. For all versions of Microsoft Outlook up to 2010, Elcomsoft Internet Password Breaker will also retrieve passwords to mail accounts and passwords protecting PST files.

If there is more than one product installed on the PC, or more than one user identity exists, Elcomsoft Internet Password Breaker will automatically locate all identities and all PST files and recover all passwords to all installed products automatically.
