

ROWABASE - Toll manufacturing of lacquer systems and dissolved raw materials

Pinneberg/Germany, July 31th, 2014 - ROWABASE, the comprehensive service programme of the Pinneberg-based manufacturer ROWA Lack, will carry out particular jobs that release customers from capacity bottlenecks or routine production work. The toll manufacturing programme for lacquer systems and dissolved raw materials helps customers to save costs, increase efficiency and also to improve safety and legislative compliance. The ROWABASE service package can be tailored to the scope of the required tasks such as procurement, production, storage, quality control and global logistics for the products.

ROWALACK 

ROWABASE

ROWA Lack has installed new vacuum dissolvers at their Seevetal site, thus investing in modern production standards. The identical configuration of these vacuum dissolvers guarantees a comparable quality picture in all conceivable trial and production phases. With the new dissolvers, only closed processors are used in the solvent sector. This enables ROWA Lack to comply with all emission-limiting requirements of the VOC regulation and reduces even further the very minimal environmental

burdens. Furthermore, all relevant processes used in the production of solvent-borne products are blanketed with nitrogen to rule out any ignition hazards. The approval in accordance with the Federal Immission Control Act (“Bundesimmissionsschutzgesetz”) secures the production site in the long term and enables ROWA Lack to increase its capacity to a sufficient degree.

ROWA Lack places the highest priority not only on quality and safety, but also on the efficient management of resources. Thanks to its ultramodern production processes, the Pinneberg-based manufacturer complies with all stipulated occupational exposure limits and statutory requirements. Thus, ROWA Lack once again continues to maintain its ISO 9001 and ISO 14001 certification.

About the ROWA Lack:

The ROWA Lack GmbH was established in 1958 and is a partner in the ROWA GROUP of companies. The brand ROWA stands for technical competence, modern product design and customer oriented service the world over. Tailored customer solutions are part of the ROWA tradition and are a matter of course! The development of new products, the search for alternative raw materials and the constant and sustained optimisation of our processes, coupled with modern technology, motivated employees and economical environment protection enjoy the highest priority in our company. In 2010 the ROWA GmbH has been renamed into the ROWA GROUP Holding GmbH and the departments Masterbatch and Lack were newly formed as ROWA Masterbatch GmbH und ROWA Lack GmbH specialist division: Special Lacquer Systems and Top Coats.
